

## MISSION

Astradec Environnement assures a global solution in the management of sludge. We come onto your sites (industries, water treatment stations, hydraulic works, tunnels, canals, construction sites...) with our equipment and our teams in order to reduce your volume of sludge and to evacuate it in an authorised way. Astradec Environnement operates throughout France carrying with it its knowledge and expertise to all levels of work required. Astradec Environnement completes its service with solutions to temporary storage (Astratank).

## OUR SOLUTIONS

### WATER EXTRACTION FROM WASTE

The Astradec One stop solution is :

- **YOU HAVE A WASTE LIQUID MANAGEMENT PROBLEM** : an incident, a recurring issue, dredging, or an extraction
- **WE CARRY OUT THE ANALYSIS** : suggest pilot projects, analyse the composition of the waste
- **WE OFFER** a bespoke solution, for the whole or a part of your project, ready to go (dredging, pre-treatment, water extraction, waste management)
- **WE DECIDE** on the size of the equipment needed to deal within your constraints and the needs of the building site
- **WE CARRY OUT THE WORK** : Our teams are trained and used to working on industrial sites within the constraints of the site
- **WE ASSURE** that our ways of managing waste legally conform to regulatory standards
- **WE ARE** your only representative

Due to the mobile water extraction unit, producers of slurry (industry, building and construction works or local authorities) reduce the volume of liquid waste to transport and purge it in an authorised way, and manage it in a reasonable and responsible way.

### *The experts with the right tools*

Astradec Environnement puts in place Filter Presses, 2 phase or 3 phase Decanters, Belt Filters and mobile table draining equipment. Astradec Environnement supplies the necessary peripheral equipment to realise your work : water screening systems, hydrocyclone units, specialised pumping mechanisms. Our teams intervene on silos, basins and other hydraulic installations.

### Experts for a managed project

Astradec Environment, is above all, a committed organisation trained to meet industry constraints. Teams that have an expert knowledge of their equipment and waste management regulations. Astradec Environment supports you in any number of sectors by collaborating with our national and international partners (material recovery, landfill in controlled landfill class 2 or 1 ...)

## WHY CHOOSE ASTRADEC ENVIRONNEMENT

One stop to care. Astra Environnement acts as your sole representative to offer solutions for your waste liquids and guarantees :

- **Bespoke solution** : each client is different and receives a unique job proposal
- **Technical and manpower considerations adapted to your needs** : our personnel are experts, qualified and authorised
- **An optimal reduction of slurry volume** : you free up space and save money
- **Works and treatment deadlines are respected**
- **We operate a transparent pricing policy with no hidden costs**
- **Intervention teams at your disposal 7/7** : due to our on call service we can assist you non-stop.

### “OUR STRENGTH IS IN OUR AGILITY”

« Our services respond to specific issues resulting in tailor-made solutions. It's what we really like, finding solutions, whatever the complexity of the task-in-hand. »

**Vincent Joosten**  
Managing Director - Astradec Environnement
